*** February/18 – October/18 - Changes reflected in January/19 invoice

*** November/18 – July/19- Changes reflected in September/19 invoice

PrintSmart Utilization Formula

Xerox uses a formula to explain how they determine the utilization rate of a PrintSmart device. Here at UF, we're trending at approximately .75% or less utilization at the enterprise level. When identifying under-utilized devices, Xerox is using .5% or less for printers and 1% or less for all MFD's as a baseline. Please click on the link for Xerox's utilization formula.
