Question:

- The manufacturer is asking for a little more detail to be able to price it out specifically. This card has artwork on it which affects pricing. Do you have any more card numbering on the card? The part # 5006PG3NN shows the part # but more #s on the card would tell the actual card #. It would let us know the artwork and specific job. The 3 in the part # is for custom artwork... we will need to know the additional digits if this exists already. Those next set of numbers tell us the job # which identify the customer. Then the last set of numbers is the actual unique card number if they print the card number on the card. Otherwise, we would need to get a copy the projected artwork to get you the complete quote.

Answer:

- The ITB document includes the full digits for our customization. Please see page 3 of the ITB Bid Document. This number was established with the manufacturer to fit the custom art needs. The full number is 5006PG3NN-A002166.
- Excerpt from the bid document:
 - “The product requested is: HID Seos Cards Part Number: 5006PG3NN-A002166. The Card stock is to be encoded with the University of Florida’s Corporate 1000 Format & Elite key.”
