COLOR ADJUSTMENTS SUB-TAB:

Use **Color Adjustments** to adjust particular characteristics of the printed color. Characteristics include **lightness, contrast, saturation, and color cast.**

Lightness: Adjusts the overall lightness or darkness of the text and images in your printed job.

1. Select the **Image Options** tab >
2. Select the **Color Adjustments** subtab >
3. Move the slider to the right to lighten or to the left to darken the colors in your print job.
4. Click **OK**.

Contrast: Adjusts the variation between light and dark areas of the print job.

1. Move the slider to the right to lighten > to the left to darken the colors in your print job.
2. Click **OK**.

Saturation: Adjusts the color strength and the amount of gray in the color.

1. Move the slider to the right for full color saturation > to the left for grayscale.
2. Click **OK**

Cyan to Red: Adjusts the color balance between cyan and red. [Increase the cyan levels, the red levels decrease].

1. Move the slider to the right to add more red > to the left to add more cyan.
2. Click **OK**.

Magenta to Green: Adjusts the color balance between magenta and green. For example, when you increase the magenta levels, the green levels decrease.

1. To adjust the colors, move the slider to the right to add more green > to the left to add more magenta.
2. Click **OK**

Yellow to Blue: Adjusts the color balance between yellow and blue. [When you **increase** the yellow levels, the blue levels decrease].

1. To adjust the colors, move the slider to the right to add more blue > to the left to add more yellow.
2. Click **OK**.
